Jaykant hatte

Aspiring SOC Analyst | Cybersecurity & Networking

9503688710 jaykanthatte3004@gmail.com LinkedIn GitHub Mumbai, India

PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate with a strong foundation in computer networking protocols, Python programming, and hardware-software integration from a 4-month IoT internship. Possesses academic project experience building full-stack web applications and hardware prototypes. Currently undertaking foundational training in Ethical Hacking, Network Security, and Kali Linux. Seeking an entry-level **SOC Analyst (L1)** role where strong analytical abilities, networking fundamentals, and quick-learning aptitude can be applied to security monitoring

EDUCATION

ST. XAVIER's ENGLISH HIGH SCHOOL & Jr COLLEGE | Thane — May 2019 - Apr 2020
10th — *PERCENTAGE : 81*

Sheth J.T.T. College of Arts & Science | Thane — Aug 2021 - May 2022
12 th HSC — *Percentage : 51*

Basavakalyan Engineering College | Basavakalyan — Dec 2022 - May 2026
B.E ECE — *CGPA : 7.6*

SKILLS

Networking Fundamentals : OSI Model, TCP/IP Suite, Subnetting/IP Addressing, DNS, DHCP, HTTP/HTTPS, Common Ports & Services
Programming Language : C, C++, Python, JavaScript
Tools & Platforms : GitHub, Git, Linux
Soft Skills : Communication, Teamwork, Problem Solving, Collaboration
Languages : English, Hindi, Marathi, Kannada

INTERNSHIP

IoT & Python Programming | Internship — Feb 2026 - May 2026
Drive Torq Mission Tech Solutions — *Hybrid · Benglaluru, Karnataka*

- Received hands-on training in IoT architecture, embedded interfaces, and Python fundamentals.
- Developed mini-projects focusing on reading sensor inputs, processing data, and controlling outputs.
- Contributed to the team's primary project, the **Smart Health Monitoring System**, assisting in code testing and sensor integration.
- Collaborated with team members to troubleshoot code bugs and verify hardware wiring connections.

Technologies / Skills Used : *python, linux, Raspberry-PI*

PROJECTS

Linux Health Dashboard | Github

- Built a real-time system monitoring dashboard showing live system overview, performance metrics, running processes and hardware information
- Added a network security view and an event centre with configurable alert thresholds
- Implemented event export for logging and analysis

Technologies / Tools Used : *Python, Streamlit, psutil*

Python and Networking Basics | Github

- Created a collection of beginner-level Python and networking projects.
- Practised programming fundamentals and core networking concepts through practical exercises.
- Documented project work to support continued learning and technical development.

Technologies / Tools Used : *Python, Computer Networkin*

Personal Finance Management System | △ Vercel

- Developed a responsive web application designed to track user income, expenses, and savings across multiple account categories.
- Implemented modular user-interface components in React to display monthly summaries and spending breakdowns.
- Configured automated budget-threshold tracking logic to notify users when spending limits are reached.
- Managed version control and branch workflows using Git and GitHub.

Technologies / Tools Used : *React, JavaScript, Next.js, Supabase, Clerk, Inngest, Vercel*
